**PAC** *rim*™

**RIMBOARD PLUS**

Precision engineered  
Laminated Veneer Lumber.

Greater strength  
and dimensional stability.

Consistently straight, flat and true.

Controlled moisture content  
minimizes shrinkage.

Pre-cut for fast installation  
with less labor.

FSC Certification Available Upon Request

## RIMBOARD PLUS

### It's True:

PacRim™ RimBoard Plus is stiffer and stronger than plywood or OSB products. It provides greater dimensional stability and design values. It's pre-cut to precise specifications for faster installation and reduced on-site labor costs. And because each board is uniformly flat and true, you assured on the same high quality on each and every job, with each and every order.

PacRim™ RimBoard Plus is an engineered Laminated Veneer Lumber product composed of solid wood veneers laid out in a parallel grain with solid veneer crossbands. It's manufactured to precise, pre-cut lengths to eliminate on-site measuring, joining and ripping. Its controlled moisture content minimizes shrinkage and sizing problems. It virtually eliminates surface defects, warping and waste.

### One More Thing:

PacRim™ is manufactured by Pacific Wood Laminates, an affiliate of South Coast Lumber Company. We source our timber from our own forestlands, peel the veneer in our own plants and manufacture our line of FSC-certified products in our own facilities. So availability is never a question, and responsible forest practices are never an issue.

If you're looking for someone to manufacture a straighter, stronger and flat-out smarter product, look no further than Pacific Wood Laminates. We can do that!

### Specifications:

Thicknesses: 1 1/8", 1 1/4"

Widths: 9 1/2", 11 7/8", 14", 16", 18", 20", 22", 24"

Lengths: 8' to 24'

Custom sizes: Please inquire.

PacRim™ RimBoard Plus: Refer to APA Form No. W345G for complete details, including allowable loads.

Precision engineered LVL for uniform strength and stability.

Straight, flat surfaces on every board.

No warping, shrinkage or waste.

Greater dimensional stability and design values.

Pre-cut for fast, easy installation.
