PACwork™

DOOR & WINDOW COMPONENTS

Smarter Parts

What makes PacWork™ Door & Window Components a smarter choice for your business? Let's start at the core of the story:

Each PacWork™ component is a precision-engineered LVL Millwork product featuring a unique parallel veneer layout and the proper number of crossbands for your specific application. They're stiffer, straighter and flat-out stronger than lumber or ordinary composite products. Provide greater dimensional stability and strength-to-weight ratios than OSB. And outperform competitive products in both price and durability.

And here's the best part: each and every component is uniformly flat and true, so you're assured of the same quality and performance with each piece, every time you order.

That's a smart start, but we've got an even better finish:

Smarter Choices

PacWork™ components are precision manufactured and precut to your precise specifications. So they eliminate measuring, cutting and waste. Install faster. And save you time, resources and money.

They're available in a wide range of options, from straight cores in either vertical or horizontal layouts to cores with edge and/or face veneer for the traditional look of solid wood. We'll even rip and chop a component for retrofitting or other special needs and ship it off to you ready to install.

Precision custom moulding and tenoning are always available. What's more, specialty parts can be ordered with a proprietary overlay to reduce the amount of primer required and to provide a smooth, longer-lasting finish coat. We can also factory prime and finish your components for immediate installation.

Smarter Solutions

At Pacific Wood Laminates, we source our timber from our own forestlands, peel the veneer in our own plants and manufacture our entire line of FSC-certified products in our own facilities. So availability is never a question, and responsible forest practices are never an issue.

Need a part of your business made stronger, easier to work with and flat-out smarter? We can do that.

PacWork™

Door components

- blank core stock
- vertical or horizontal core stiles
- rails
- lockblocks
- mullions

Window components

- blank core stock
- vertical or horizontal core stiles
- jamb
- headers
- rails
- mull posts
- casement parts

Value-added services

- custom cutting
- precision machining
- edge banding
- face veneers
- laminating
- priming
- finish coating
- PET and DET
- HPL overlays
