

Sanded Plywood

Our sanded plywood panels are produced with phenolic resin and meet the exterior classification. They are designed and suitable for exposure to weather or moisture.

Sanded products include a broad range of applications in both residential and non-residential markets. These opportunities include, but are not limited to soffits, stair treads and risers, cabinets, furniture, paneling, shelving, and accent panels. Specialty sanded panels include marine grade, solid cross band underlayment, sub-strait for high pressure laminates, exposed ceilings, and concrete forming projects.

Products

AAX, ABX, BCX, ACX, CCPTS, BCPTS

Standard Panel Thicknesses

1/4" - 1 1/8". Other thicknesses are available upon request (certain restrictions apply).

Specifications

Standard Size: 4' x 8'
